office@satl.com.ua

Хімічний склад:

вміст сірки у вигляді SO₃ - 42%
вміст кальцію у вигляді CaO - 30%

AgroSupra S (calcium sulfate) – Calcium-sulfur fertilizer with CaO content – 30%, SO₃ – 42%, which are in easily accessible form for plants and are aimed at improving the quality and increase yield, as well as improving the condition of the soil. Country of origin – Poland.

Sulfur in AgroSupra affects the level of protein, fats, gluten in your harvest. It also improves the plant's absorption of nitrogen fertilizers from the soil, helps to dissolve phosphorus to easily accessible forms for plants and increases the availability of potassium, calcium, magnesium and iron to plants. Calcium in AgroSupra S enhances metabolism, improves soil condition, neutralizes heavy metals, increases the heat resistance of plants, provides a good development of the root system.

The combination of sulfur and calcium in AgroSupra S will provide you with high quality harvests, as well as their absolute increase.

AgroSupra S is an instrument of a modern agronomist to increase profits! We are convinced in that because we have tested the effect of AgroSupra S on our own fields.

Physical and Chemical Properties of AgroSupra S

Characteristics	Unit	Values
Content of total amount of sulfur in the form of SO ₃	(%)	42
Content of total amount of calcium in CaO	(%)	30
Granulated, dipped through a 10.0 mm sieve	(%)	≥99
Granulated, dipped through a 2.0 mm sieve	(%)	≥80
Solubility	(%)	100
Color	-	Light beige
Moisture	(%)	Up to 12%

AgroSupra S Price

Payment terms	The price is in EUR / t with VAT
Prepayment	123
Payment before 01.09.2017	128
Payment before 01.11.2017	132
